

Enjoy high quality  
water, live a healthy  
lifestyle and protect  
your new home  
investment.

*Better water. Better taste.  
Better health!*

# Is your tap water safe?

Ever wondered why everyone is drinking bottled water now days? It's hard to believe, but bottle water now outsells all soft drink brands, combined.

**What does this tell you about the quality of our tap water?**

Let us help you live a healthy lifestyle and improve the quality of your water!

## PRIMARY WATER QUALITY PROBLEMS

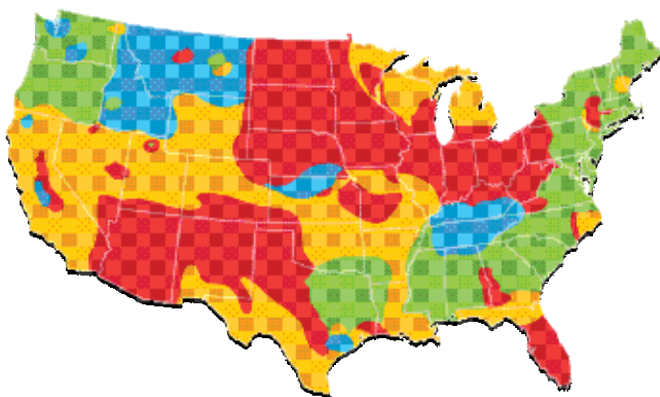

### City water

- Lead
- Mercury
- Other heavy metals
- Harmful chemicals (VOCs)
- Trihalomethanes (THMs)
- Water hardness
- Too much Chlorine
- Foul tastes and odors

### Well water

- Water hardness, Iron & Sulfur
- Nitrates from fertilizers
- Bacteria and Cysts
- Other harmful microorganisms
- Lead from corrosion (low pH)
- Toxic chemicals
- Arsenic, Tannin, Sediment

# Hard Water Problems

**HARD WATER MAP**

Hard water areas of the United States are shown above. (Hard levels are shaded in red and orange; moderate levels of hardness are shown in areas shaded in green.)

Hard water creates havoc in the home, and creates two primary problems, described below:

**SOAP RESIDUE**

Soap, detergents and shampoo do not fully dissolve in hard and moderate levels of hardness. This undissolved soap leaves a residue on shower doors, your skin and in your hair, resulting in “bad hair days”

Hard water scale forms in your pipes and water related appliances. This scale may damage your water heater, washing machine, dish washer, coffee maker and other appliances.

**HARD WATER SCALE**

# Two-Tank System for City Water Quality Improvement

## MODEL A2

Our Model “A2” combination system is designed for city water to provide filtration and remove water hardness. This unique system has two tanks.

Tank #1 is the whole house water filter.

Tank #2 is the water softener and conditioner.

With Model “A2” systems you get two treatments for one affordable price!

### ***Removes / Reduces:***

- ***Harmful chemicals***
- ***VOCs***
- ***Chlorine tastes & odors***
- ***Chloramines***
- ***Heavy metals***
- ***Water hardness***

***Two-Tank combination whole house water filter and water softener.***

### SIZING CHART

Model	Tank Size	Bathrooms
A2-100	10" x 44"	1-2
A2-150	10" x 54"	3-5

B-300	14” x 65”	6 or more

# Water Softeners & Conditioners

## MODEL C

Enjoy soft water, protect expensive appliances, prevent plumbing repairs, eliminate stains and reduce soap, detergent and shampoo usage with our model “C” systems.

### Benefits:

- *Soap works better in soft water!*
- *No “bad hair days”*
- *Softer skin*
- *Brighter laundry*
- *No mineral deposits*
- *No Calcium scale*
- *Fewer plumbing repairs*

### SIZING CHART

Model	Tank	Bathrooms
C-100	10”x 44”	1-2
C-150	10”x 54”	3-5
C-300	14”x 65”	6 or more

# Well Water System

## MODEL D

*“Iron & Sulfur Filter”*

**No Iron Stains**

**No Sulfur Odors**

***Chemical-Free treatment for Iron,  
Sulfur and Manganese.***

Model “D” systems remove Iron, Hydrogen Sulfide and Manganese without the use of chemicals. Our special filter media uses air for oxidization, forming particles which are more easily filtered. Operation is automatic.

### MODEL

Model	Tank Size	Type
D-150	10” x 54”	Residential applications

Note: If bacteria are present, chemical treatment is required.  
Contact your distributor representative for more details.

# Acid Neutralizer

## MODEL E

*Prevent corrosion from Acidic Water!*

*Corrosion like this can put pin holes in your copper pipes and leach lead from plumbing fixtures into your water.*

Model “E” systems are designed for well water when pH is at 6 or below. Comes with dome hole tank for easy media replenishment.

### MODEL

Model	Type
E-150	Acid Neutralizer; 10” x 54” tank

# Enjoy clean, pure, safe water with your very own well water treatment plant.

If you get your water from a private well and suspect your water may not be safe, you may need our “Home Water Treatment Plant”. This system provides chemical treatment with Hydrogen Peroxide for disinfection and a whole house filter to remove harmful chemicals.

Optional equipment includes a water softener, Iron / Sulfur filter, acid neutralize and other equipment, based on what’s in your water and your water analysis.

## Removes / Reduces

### Basic System

- Bacteria, Cysts & Viruses
- Other harmful microorganisms
- Chemicals and VOCs

### Optional Equipment

- Water softener
- Iron & Hydrogen Sulfide filter
- Acid neutralizer
- Nitrate filter
- Arsenic filter

Note: Please contact our distributor for pricing, based on your water analysis.

# Drinking Water
